

Kalvostart® Elite

Kalvostart Elite is a premium milk replacer for rearing calves which is advised to use directly after colostrum. Kalvostart Elite is based on high quality, easy digestible whey protein from milk produced by our own FrieslandCampina farmers and spray-dried fats of which at least 40% consist of highly digestible coconut oil. Kalvostart Elite contains 50% skimmed milk powder for a more gradual digestion. Furthermore, Kalvostart Elite is supplemented with Imagro®, our registered health concept of pre-biotic (GOS), pro-biotic and organic acids.

Recipe code	:	6154100 (06.01)
Description	:	A supplemented milk replacer for calves
Application	:	Milkreplacer for rearing calves up to 4 months
Advised inclusion rate	:	Check packaging for feeding schedule and preparation information
Appearance	:	Creamy white powder
Product specification	:
